

Keyboard Crazy Software

Keyboard Crazy is a typing game that helps children to learn the layout of a computer keyboard and other functions encountered in everyday use of a computer, using both the mouse and the keyboard, while partaking in 19 different literacy games.

The games in this set are suitable for children aged from 5 - 8 years of age and teach upper and lower case alphabet, spelling, noun, verb and adjective recognition, and rhyming. The games allow children to store their best times in the 'Hall of Fame.'

New players to the game are automatically given the "Typing Test" game first, to get a baseline score for their original typing speed, this is stored to enable a comparison to be made at a later date.
